Addition of 0.20 seconds to time mean time.....

Guidelines for Time Recording

1. Notes for Recording Manual times

- ✚ A minimum of 3 and maximum of 5 watches may be used per skater
- ✚ Where 2 or more watches record exactly the same time then that becomes the time recorded
- ✚ If all the times recorded are different, then fastest time and the slowest time are taken out and the 3 remaining times are recorded (this applies only where 5 times are recorded. If 4 times are recorded then the mean is taken of those 4 times).
- ✚ The mean is then taken of those remaining 3 times
- ✚ An addition of 0.2seconds is added to the resulting time recorded
- ✚ Any published list are clearly marked as manual times
